

ASHI VOLUNTEER SPOTLIGHT

Alan M Sanfilippo, PhD, D(ABHI)
Beth Israel Deaconess Medical Center, Harvard Medical School

What committees do you serve on? I serve on the Bylaws and Proficiency Testing committees. I am also an ASHI Inspector.

How did you get started as a volunteer for ASHI? I approached the volunteer booth at an ASHI Annual Meeting and asked what committees were looking for new members.

How has volunteering for ASHI improved your professional development? I have learned a great deal through volunteering which has helped me implement changes in our laboratory policies and procedures.

Why do you think it is important for others to volunteer with ASHI? Volunteering fosters a collaborative environment and helps ASHI and all ASHI labs/members grow personally and professionally. I have made some great friendships through volunteering and have learned so much; I hope I can continue for a long time to come.
