

TECHS ON THE MOVE

Justin House, CHS

Where are you working now? Mayo Clinic Arizona

What is your new position/title?
Lead Technologist

What opportunities are you most looking forward to? I'm looking forward to sharing my 10+ years of experience in the field with those just entering the world or HLA. I am also excited to learn about the inner workings of the lab from this new point of view.

What are your new goals? I would like to improve the environment of the lab for the technologists. I know the struggles and demands of the job and am excited to be able to give them a voice in decisions. I would also like to gain a better understanding of the relationship between test results and how they affect the patients that we serve.

What is your ideal work culture? My ideal work culture would be an environment where everyone's opinions are respected and valued. I would like everyone to be equal in decision making so that everyone's expertise and strengths are used to better the overall quality of life in the laboratory. Ideally, handoffs and shift changes in a laboratory should happen in a way that promotes fluidity, precision, and accuracy.
