

ASHI VOLUNTEER SPOTLIGHT

**Linda Olsen, MPH, MLS(ASCP), CHS(ABHI)
Mayo Clinic in Arizona**

What committee do you serve on? The Technologists' Affairs Committee

How did you get started as a volunteer for ASHI? I just submitted a volunteer application!

How has volunteering for ASHI improved your professional development? I love learning from committee members and leaders. I have received help with lab issues, validations, career planning... you name it! Getting the chance to

work closely with folks from a variety of labs and with a variety of experiences is so helpful.

What is your most memorable volunteer moment? Delving into the answers from the salary survey, plus our fun and informative Tech Affairs virtual happy hours!

Why do you think it is important for others to volunteer with ASHI? It makes a difference to know that we are connected to others in the field. Whatever our labs and patients are coming up against, others in the field are experiencing it too. Volunteering with ASHI is a great way to build connections and influence future practices.
