

## ASHI MEMBER SPOTLIGHT

**Terry Harville, MD, PhD, D(ABMLI), F(ACHI)**  
**Professor / Medical Director University of Arkansas for Medical Sciences**

**Graduated from:** University of Florida

**How long have you been an ASHI member?** 20 years

**When was your first ASHI Meeting?** I believe my first ASHI meeting was in San Antonio, about twenty years ago. I remember putting "faces" with names of those I had been in contact with.

**What made you decide to work in HLA?** I am trained as an Immunologist and Rheumatologist. Early in my career I performed bone marrow transplants for patients with severe immune abnormalities. I was asked to manage lupus-patients regarding their renal transplants. I was part of the cardiac transplant team. During this time, I worked with the HLA laboratory team, as I was performing donor selection. Since I am also a molecular biologist, in the early 1990s, I was helping to develop molecular techniques for HLA typing.

**What do you find to be the most rewarding aspect of your work?** One of the most rewarding experiences is helping patients do well.

**Fun fact:** I like music. I play a mountain dulcimer... I wished I could play it well.
