Take advantage of our 5# blocks of frozen shrimp so you have shrimp in your freezer all the time. All you need to do to thaw a few is unwrap one end of the block and place into a colander. Run **cold** tap water over that end only until a chunk the size you want is ready to break loose. Re-wrap the remainder of the block and put back in your freezer. Allow the semi-thawed shrimp to thaw at room temperature or continue running cold water over them. Cook and enjoy.
