- **2026 Ecclesiastical Theme & Focus: Open at the Top**

In 2026 we will be using the CSL Annual Themes.

Yearly Context: Ernest Holmes consistently reminds us that Science of Mind must remain a living teaching: “Shorn of dogmatism, freed from superstition, Open at the Top for greater illumination, unbound and unlimited,” (Science of Mind Magazine Oct. 1971 pg. 16) yet grounded in timeless spiritual principles. He cautions us against closing our minds through certainty and instead urges us to stop, look, listen, and ask ourselves, “Does this that I believe measure up to Truth?” For Holmes, being Open at the Top means cultivating curiosity, embracing doubt as part of our path, and trusting that new wisdom and greater illumination are always available to us if we are open to it. It is a call to live in the creative “What If,” to stretch beyond what is comfortable, and to embody a spirituality that grows, questions, and evolves with us and the world.

As a spiritual movement, being Open at the Top means embodying our Global Vision: a world that works for everyone and all of creation. It invites us to live as one global family, honoring the interconnectedness of all life, embracing diversity, and choosing love and connection over righteousness. It calls us to personal responsibility and social conscience, to sustainable and just practices, and to the joyful, creative expression of Spirit through us. To be Open at the Top is to release outdated practices and fear-based thinking, to honor ancestral wisdom while welcoming new visions, and to live from the eternal Truth that Love is forever creating, forever becoming, and forever expressing in, through and AS each of us.

Every month is designed to address the theme from four different perspectives or lenses:

- Personal Outer
- Personal Inner
- Collective Outer
- Collective Inner.
- 5th Sundays offer a fifth perspective of our shared wholeness and unity using the perspectives explored during the previous weeks in the quarter.
