Pittsburgh, PA – August 11, 2025

Triangle Fastener Corporation Acquires DB Building Fasteners

Triangle Fastener Corporation (TFC) is pleased to announce the acquisition of **DB Building Fasteners (DB)**, effective **August 8, 2025**.

Founded in 1997, DB has established itself as a leading supplier of fasteners and related products for the metal building and metal components construction industry. With approximately 25 employees across two locations, DB generated **\$11.5 million in sales in 2024**. We are excited to welcome these talented individuals into the TFC family.

This acquisition represents a significant step in TFC's strategic growth plan, expanding our presence in the western United States and enhancing our proprietary TFC-branded product portfolio. Alongside our recent acquisition of **Pro Fastening Fasteners in November 2024**, this brings our footprint to **32 U.S. locations, 3 distribution centers, and 9 paint facilities** dedicated to finishing fasteners.

By integrating DB's industry expertise and established sales infrastructure, TFC is well-positioned to deliver exceptional service and support to customers both locally and across North America.

Since our founding in **1977 in Pittsburgh, PA**, TFC has grown from a single location into a national brand, serving the **roofing, metal building, drywall, and acoustical trades**. Our innovation and product development efforts have produced a robust line of proprietary brands, including **Concealor®, Blazer®, and APS500®**, along with a broad range of patented and trademarked construction solutions.

As a proud member of the **SFS Group**, TFC plays a leading role in expanding SFS's footprint in key U.S. markets. Headquartered in **Heerbrugg, Switzerland**, SFS is a global leader in precision components, mechanical fastening Fasteners, quality tools, and logistics solutions. Operating in **140 locations across 35 countries**, SFS Group's approximately **13,500 employees** achieved **\$3 billion in global sales**.
