2 orthopedic practices join forces to better serve patients

Star staff report

Sep 15, 2026

Winchester Orthopaedic Associates (WOA), a division of the Centers for Advanced Orthopaedics that has provided orthopedic care in the Shenandoah Valley for more than 50 years, has expanded by adding the Bone and Joint Specialists of Winchester.

The partnership unites the expertise of two established orthopedic practices under the WOA name and, according to a media release, strengthens WOA's longstanding presence in the greater Winchester area by bringing additional physicians and patient-centric care to meet the region's needs. WOA's team now includes eight orthopedic physicians and nine advanced practice providers, giving patients greater access to comprehensive, physician-led musculoskeletal care.

"Winchester Orthopaedic Associates has cared for families in this community for decades, and welcoming the talented team at Bone and Joint Specialists of Winchester empowers us to build on that legacy," Dr. Tom Wise, a musculoskeletal expert and surgeon at WOA, said in the release.

"Together, we're enhancing access to the full range of orthopedic expertise patients need without ever having to leave Winchester for specialized care."

The growing WOA practice offers expertise across a broad range of orthopedic specialties, the release states, including sports medicine, joint replacement, hand and upper extremity care, trauma, physical therapy, hand therapy, occupational therapy and non-operative care.

Patients can continue to visit both Winchester locations: Winchester Orthopaedic Associates at 128 Medical Circle, and Bone and Joint Specialists at 152 Linden Drive.

Winchester Orthopaedic Associates has provided comprehensive and compassionate orthopedic care since 1973 through a team of providers devoted to offering personalized treatment to patients of all ages, the release states.

The Centers for Advanced Orthopaedics is one of the largest providers of orthopedic care in the country. The organization was formed in 2013 to provide patients with the same personalized service and superior care they have come to expect from a private practice, while benefiting from the efficiencies, resources, accessibility and broader insurance options of one of the country's largest orthopedic practices.
