

Adding Dependents Simplified

This is a sample of what will show above a member's benefits after a life event is created. This is on the "Shop for Benefits" step. Just check the box if you would like to enroll the dependent in that plan.

The screenshot shows a progress bar at the top with three steps: 'Profile' (checked), 'Shop for benefits' (checked), and 'Confirm & Finish'. Below the progress bar, the heading 'Select benefits to update' is followed by the instruction 'Now that you've entered your life change information, it's time to update your benefits.' There are two tabs: 'Previous Benefits' and 'Current Benefits'. The main content area displays a card for 'Spouse Test Member Jr.' with the role 'Spouse'. A red circle highlights the text 'Next dependent(1/4)'. To the right, under 'Manage Spouse's coverage.', there are two checkboxes: 'Medical' and 'NCFlex Dental', both of which are currently unchecked.

Once "Next dependent" is clicked, it moves to another dependent.

The screenshot shows the same progress bar and heading as the previous image. The main content area displays a card for 'Male2 Child Member' with the role 'Child'. Below the name, it says 'Next dependent(2/4)'. To the right, under 'Manage Male2's coverage.', there is one checkbox: 'NCFlex Dental', which is currently unchecked.

The only benefits that will show as options to add will be those that the member is already enrolled in and the dependent is not enrolled in.
