

State Route-29 Pavement Rehabilitation and Complete Street

State Route 29, also known as Sonoma Boulevard, in Vallejo is making some head way. This project has seen its fair share of challenges, but it is nothing crews aren't ready to work through. Shortage of material, some unexpected rain delays, and design conflicts that had to be resolved have made their appearances in this project, but in the last couple of weeks crews have been filling in curbs, standing up new lighting poles, and preparing for the highly anticipated paving of 6 mile route. Once the paving starts it will be a straight to the end.

Work is expected to complete Winter of 2026

Take a look at an animation created to see what to look forward to once the project is complete. [State Route- 29 Animation](#)
