

Brief Project Description

This three-year project funded by the Heising-Simons Foundation builds a **network of teacher educators** across California interested in the mathematical learning of young children. We provide on-going **professional learning opportunities in early math** for community and state college early childhood instructors, specialists, coordinators, and coaches of prospective and practicing early childhood teachers. We build on the extensive resources developed by the **Development and Research in Early Math Education - Teacher Educator (DREME TE)** Project to support participants to integrate ideas of early math into their own courses, professional development, and classroom-based support for preschool teachers.

2019 Early Math Fall Institute (Central Valley)
September 20-21, 2019
Fresno City College, Fresno, CA

Upcoming in Summer/Fall 2020
Early Math Institute (Bay Area) &
Early Math Institute (Los Angeles Area)
Dates and Locations TBD

In collaboration with:
Megan Franke, UCLA
Angela Turrou, UCLA
Deborah Stipek, Stanford
Linda Platas, SF State
