

# NCCER Craft Instructor Certification Training

## June 18 & 19 in Camarillo

Sponsored by Proposition 39  
Clean Energy Jobs Act and free to  
Community College Faculty and their High School Pathways Partners.

The National Center for Construction Education and Research (NCCER) develops standardized construction and maintenance [curriculum](#) and [assessments](#) with portable credentials. These

credentials are tracked through NCCER's [registry](#) that allows organizations and companies to track the qualifications of their craft professionals and/or check the qualifications of possible new hires. NCCER is a programmatic industry-standard curriculum appropriate for skilled & technical trades, including:

**Advanced Manufacturing**  
**Construction & Maintenance**  
**Energy, Pipeline & Utility**

exams and **NCCER's portable, stackable, industry-recognized Credentials**. All the curriculum is developed by industry SME's (Subject Matter Experts) under a consistent instructional design model to set the benchmark for professional craft-worker development.
