

# EARTH DAY PROJECTS THAT LAST LONGER THAN A DAY

Fly less.

Line dry your clothes whenever you can.

Car pool.

Walk or bike more.

Find out about installing a heat pump for your home, your hot water heater, your cottage.

Repair everything You can.

Maintain and service your septic system Properly.

Use a small trailer or roof rack so you only need to drive 1 car to the cottage.

Buy fewer and/or used clothing.

Take your compost to the dump.

Buy local.

Plant a shade tree

Consider an EV for your next car

Humidify your home during the winter by hanging your clothes indoors to dry.

Take shorter showers

Throw away less.

Check your tire pressure.

- Plant a white pine sapling for a child and measure every year to see who grows faster.

Grow a few veggies.

Plant a fruit tree

Set up your own composter.

Always keep soap, shampoo and cleaning products out of the water

Use your canoe or kayak more and your power boat or jetski less.

Mow a smaller area around your home or cottage.

Drink tap water

Plant a few more indigenous shoreline plants.

Leave those water weeds where they are.

Buy low and no package goods whenever possible.

Drive below 100km/hr.

Avoid using or buying plastic wherever possible.

Rewild: Restore natural vegetation to drawdown carbon.
