

VACCINE DISTRIBUTION: PHASED PRIORITIZATION

- Vaccination rollout phases will be continuous and overlapping – Phase 2 vaccinations likely to begin while Phase 1 is still ongoing (e.g., vaccination of adults >80 may begin in parallel or before low-risk health care worker vaccination).
- Vaccination schedules are intended to be flexible and responsive to ongoing needs, vaccine logistics and risk factors.
- Ontario is ready to receive vaccines whenever they are available, and will shift to Phase 2 priority populations as soon as there are sufficient vaccines provided by the Federal government.

	FIRST VACCINES ARRIVE	PHASE 1	PHASE 2
People	<ul style="list-style-type: none"> • Staff and essential caregivers in LTCHs and high-risk Retirement Homes (RH). 	<ul style="list-style-type: none"> • Residents, staff, essential caregivers, and other employees of congregate living settings that provide care for seniors. • Health care workers. • Adults in First Nations, Metis and Inuit populations. • Adult chronic home care recipients. 	<ul style="list-style-type: none"> • Older adults, beginning with those ≥80 years old and decreasing in 5-year increments over the course of vaccine roll-out. • Those living and working in other high-risk congregate settings. • Essential Workers, beginning with front-line essential workers. • Individuals with high-risk chronic conditions, and their caregivers. • Other populations and communities facing barriers related to the determinants of health across Ontario who are at greater COVID-19 risk (e.g., Black and other racialized populations).
Places	<ul style="list-style-type: none"> • 2 Initial locations • Ramp up to 19 locations 	<ul style="list-style-type: none"> • Specialized vaccination centres (LTCH/RH) • Mobile vaccination sites • Mass vaccination sites 	<ul style="list-style-type: none"> • Mass vaccination sites • Hospitals • Mobile vaccination sites • Pharmacies • Clinics • Primary care • Strategic in-community locations (CHC/AHAC)
