

# Breaking the Mold of Population Health *for Diabetes & Metabolic Disease*

---

July 13, 2021

Midwest Business Group on Health

---

Catalysts for *Change* in Health Care & Benefits

# ● DAY — TWO

---

Stephanie Duggan, MD

Regional President & CEO

Ascension Michigan's Northern  
Ministries St. Mary's Ascension  
Hospital

---

Andrew Federici

Vice President, Marketing

DayTwo

# The mold of population health must be broken

*1-size-fits-all = mediocre result over and  
over and over and over and over and over  
and over and over and over and over and  
over and over and over and over and over  
and over and over and over and over and  
over and over and over and over and over  
and over and over and over and over and  
over and over and over and over and over  
and over and over and over and over and  
over and over and over and over and over*

# Why are we still doing the same thing?

## **Insanity:**

Doing the same thing over and over again and expecting different results.

*Albert Einstein*

# A perfect example: metabolic diseases affect 50% of US adults

Population

38MM

Type 2 Diabetes

Human Impact

1 in 10

Population

88MM

Pre Diabetes

Human Impact

# The problem: traditional approaches are limited

Decades of "one way to spread it!"

1-size-fits-all, hard to maintain

**ADA  
Guidelines**

Expensive + Side effects

**Medication**

1-size-fits-all, hard to maintain

**Strict Diet**

Expensive + Invasive

**Surgery**

# The problem: medications are not personalized

**Amblify** (*aripiprazole*): Schizophrenia

**Nexium** (*esomeprazole*): Heartburn

**Humira** (*adalimumab*): Arthritis

**Crestor** (*rosuvastatin*): High cholesterol

**Cymbalta** (*duloxetine*): Depression

**Enbrel** (*etanercept*): Psoriasis

**Advair Diskus** (*fluticasone propionate*): Asthma

**Remicade** (*infliximab*): Crohn's disease

**Copaxone** (*glatiramer acetate*): Multiple sclerosis

**Advair Diskus** (*fluticasone propionate*): Asthma

# The science has changed, the time is NOW.

## ***Diets are 1-size-fits-all***

Says "yes" & "no" to certain foods  
for all people with metabolic  
diseases

Source: data adapted from USDA

With microbiome  
insight, we can  
provide precise  
direction

## *N of 1 Nutrition*

Individuals respond to foods  
differently

***Food is.....***

***Love, Family, Celebration***

***Pain, Hate, & Sadness***

***This is not only psychological but also physiological***

# The problem: food choices are the biggest stressor

TABLE 1. Ranking of Factors That Have a “Big Impact” on Daily Life With Diabetes by Respondents’ Diabetes Type and Therapy

Rank*	Diabetes/Therapy Type		
	T1	T2I	T2NI
1	Food choices (63%)	Food choices (67%)	Food choices (64%)
2	Time-in-range (57%)	Time-in-range (45%) A1C (44%)	Time-in-range (41%) A1C (41%)
3	Unexpected blood glucose numbers (42%)	Nondiabetes health issues (36%) Dosing insulin (34%)	Nondiabetes health issues (31%)
4	Dosing insulin (37%)	Unexpected blood glucose numbers (28%)	Unexpected blood glucose numbers (20%)
5	Hypoglycemia (30%) A1C (30%) Nondiabetes health issues (27%)	Symptoms of complications (24%)	Symptoms of complications (15%)

# Member Success Stories

THERESA

**A1C: 7.9 to 5.8**

I'm not hungry all the time and I'm not tired all the time. The support system, individual scores, and results are amazing.

LIZ

**A1C: 8.2 to 7.5**

I feel I have a lot more energy, able to do my job better - don't get as tired. This has been transformative."

TOM

**A1C: 8.1 to 6.7**

It's a program designed around my body's reaction to food. I'm never hungry, have so much more energy, and I'm losing weight

CARL

**A1C: 7.3 to 6.1**

My dietitian kept me motivated and responsible. You have changed my life, I am really grateful for you.
