

APPRENTICESHIP

Our second-year Carpentry class (Carpentry 2.2 C Pines) spent a productive week at our Livermore Training Facility under the guidance of our instructor William Marini. The hands-on training focused exclusively on Performance Profiles in drywall installation and finishing, door and door hardware, window, door, floor and ceiling trim, as well as cabinet installation. All five Carpentry apprentices who attended the class, successfully completed it. They gained extensive knowledge, advanced techniques and practical experience in each of the specialized Performance Profiles.

The NCCER Performance Profile is a structured assessment tool used to evaluate the hands-on skills and competencies of individuals in various construction and maintenance trades. Developed by the National Center for Construction Education and Research (NCCER), these profiles are part of the NCCER curriculum and certification process.

The five Carpentry apprentices will now move on to the 3rd year of their apprenticeship training program.
