Greetings from the Greenhouse!

God is Great!

With all the uncertainty this year has provided so far, we have been blessed. I was amazed at the sales for the Spring season, especially the veggie plants. We sold out of green bell pepper plants and then all of the red, yellow and orange. Well over 1500 plants were sold. The 11 varieties of tomatoes were the next to be depleted. Just a few sad cherry tomato plants were left. Our flowers were a different story this year. The limitations that this year has posed, our sales were great, but COVID-19 restrictions and concerns put a damper on our plans to increase sales beyond any recent year. Since our planning and planting began well before we were aware of the challenges to come in 2020, we had quite a few plants left unsold. Although we are planting them on campus as time allows, sadly, many will find their way into our compost pile.

However the future is bright! The produce in Greenhouse #4 and the High Tunnel are doing very well. I am selling everything I have to sell. Since I am not helping out at work camp this year, I can devote all my volunteer time to the Greenhouse Operations. My hope is that the Greenhouses will become a self-sustaining, year-round business, instead of seasonal, thus allowing us to employ some dedicated workers to keep it growing.

We are also still on track to spruce up GH #2 this Fall. Just like last year with GH #1 we will remove the current plastic covering and replace it. The ends will be made more permanent using polycarbonate panels and metal to replace the current wood and plastic. This improvement has made GH #1 much more efficient and we expect the same results for GH #2. **Unfortunately, this process isn't cheap.** We will need about $4000.00 to complete the improvements.

All donations are greatly appreciated.

Thank you for all of your support!
