GROW APPALACHIA

BEREA COLLEGE

Our Grant Proposal for 2021 has been APPROVED.

We currently have been taking applications to meet our goal of gardens for 2021. 40+ gardeners have signed up already to participate, our youngest gardener is 5 years old and the oldest doesn't want to give out her age.

We've seen a rising number of gardeners due to pandemic uncertainty.

Gardening is a year round job even when it's cold and snowy there's still work to do; planning for the needs of our gardeners and working to get plant and seed orders together to begin the planting season.

We have had a hard time finding equipment last year especially canning supplies. 16 qt presser canners were one of the most elusive items to find. We are getting a jump start this year to collect necessary materials to provide the best opportunities to our gardeners.

We are looking forward to serving our community gardeners throughout the coming year.
