Summer Feeding Program

The past 12 months have presented unprecedented challenges to nearly every facet of life, and this period has been particularly challenging for our faith-based non-profit organization.

The needs of the community we serve are increasing as they are continuously squeezed by the ripple effect of economic impacts generated by COVID-19 control policies.

One ministry that has been tremendously impacted is our Summer Feeding Program. Before COVID-19, children came on-site and participated in our day camp which included breakfast and lunch. We had to rethink our process to reach these children that needed those meals each day. Four mobile sites have been set up for parents to visit at specified times to get breakfast and a hot lunch for their children. Three youth development workers, Henderson Settlement's kitchen staff, and several volunteers prepare, package, transport, and distribute these meals at each site.

In June we served 6,488 meals to community children. God continues to go before us and open doors. We are incredibly thankful for His ever-faithful provision and for His people the church, our partners in ministry!
