Henderson Settlement Operational Restart

The Spring of 2020 has presented a huge challenge to our nation, and also to most of the world. We have carefully applied Governor Beshear's directives, adjusting our approach several times to meet increasingly restrictive guidance. We have included our early-April COVID-19 position statement in this newsletter, so that you will have a better feel for the activities we were able to sustain in order to continue to support the community we serve. While the Frakes area has been blessed in not yet having had any COVID-19 reported cases, the economic impacts of the directives have hit our already struggling community hard!

Obviously, the virus management impacts are not over, but we are beginning to think about how and when we will be able to re-start the portions of our operations we were required to shutter for an extended period. **We are hoping to be able to re-start Work Camp operations at some level in early June, depending upon the Kentucky plan for re-opening.** Our Thrift Store, Craft Shop, and other activities will follow, based upon our ability to recall staff members from lay off.

We thank you for your continued faithful support though this crisis period, and for your prayers as we prepare to resume operations.
