Greenhouse Operations

We have had a really great year.

Sales are up from last year. Marketing to churches and individuals that bring down donations has been a wonderful success. It was so successful we ran out of some plants even before the GH officially opened. Plants and seeds have already been ordered for 2020. We have increased the amount purchased to hopefully fill all orders and have extra. Contact us if you are interested in placing an order in the Spring.

Greenhouse #1 got a much needed face lift. It now has permanent ends made of polycarbonate. New doors, plastic, and shade cloth. Isn't she a beauty!

GH #1 & 2 both are complete with new tables. Thanks to the teams of work campers 110 are DONE. We only need 20 more to finish GH #3. How awesome is that.

The High Tunnel is coming along nicely. Even though we are still trying to amend the soil we currently have cucumbers, tomatoes, cabbage, and okra growing. The beans have been taken down after providing several hundred pounds of produce.

The Mums were gorgeous!

We had two schools and a handful of churches/ work teams do fundraisers through us this year. Over 1200 mums were sold. Wow!

The Greenhouse and Grow Appalachia combined their resources to have a booth at the Harvest Festival. We had gourds, pumpkins, ornamental corn, cornstalks, and mums. Beautiful bows were made by Pam Lambdin, Tim's wife, for us to sell too.

Looking ahead to the Mother's Day Event in 2020. In addition to the ceramic mugs we will be needing plastic mugs and small plastic pots. We have had some breakage issues with the ceramic mugs. One of the schools would like us to use items that are safer for the children. Let us know if you can help with **colorful plastic mugs and pots**.

Thank you for all of your support!
