Clinic Conversion to Administration Building

For a number of years, Henderson Settlement operated a clinic staffed by part-time and volunteer dental and medical personnel. This ministry never really developed the following that we anticipated and the facility was closed in 2014. Since that time, the building has been largely vacant, seeing only periodic use for a few days each year by our volunteer dental staff. (*We will soon have an exciting new solution for the dental need to announce*.)

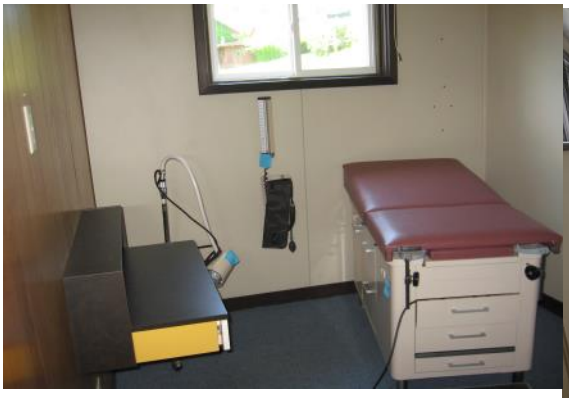

To best use this building to support our ministry into the coming decade, it has been decided to transform this building into a refurbished, single-story Administration Building. **A volunteer supporter with architectural skills has developed an initial plan (expect some changes to the diagram on next page), and a very generous donor has funded the initial phases of this project!** We have already cleared, repurposed, and donated useful equipment from the space, and have begun the initial demolition work.

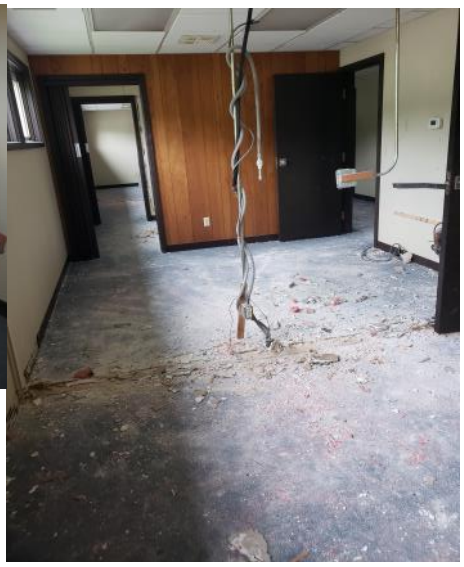

The Clinic building is soon to become the new Administration Building. (Above, view from Highway 190. Below, the view across the parking lot.)

We will be excited to share with you the progress with this project as it progresses. With this change, we will gain safe and adequate parking space, an entry without steps, a lobby area in which to greet and properly connect community members, volunteers, and guests, **we also plan to upgrade our telephone system to a more current and reliable platform that has technical support and replacement parts availability.**

From the original small exam rooms to larger spaces for offices and meeting spaces.

New Floor Plan
