Farm Equipment Fund Raising

Early in the Fall of 2020, we purchased a new Vermeer Hay Roller to replace the failed New Holland unit we had nursed for years. Our old equipment had more than passed the end of its service life, and was no longer a candidate for further repair. The new Hay Roller is a joy to operate! Only someone who has farmed can truly appreciate the experience of taking a piece of equipment into the field with the certainty that it will perform flawlessly. While the new equipment was selected in part for its heavy duty design, we still included a set of the wear parts that will ultimately need to be replaced when we purchased the unit. We also extensively trained on the maintenance and operating guidelines. We can expect years of effective service from this machine, and we are truly thankful to have it!

A number of faithful Farm Supporters have rallied to help us fund this purchase. I am pleased to report that 48% of the $28,100 total purchase price has now been funded by gifts for this purpose. We hope to completely fund this purchase this year, and to also gather the resources to purchase a Hay Fluffer, and even more importantly, a Hydraulic Fence Post Driver with a Rock Spear. We have successfully been awarded a grant contract from the USDA for Phase II of our Farm Recovery Plan. This phase will include fencing, watering, and other improvements in the second section of our pastures and fields … those located closer to our main campus. Much of these planned fence runs will be in extremely rocky conditions. The post driver we would like to acquire is designed for these conditions.

If you would like to financially support our Farm equipment needs, you can do so by sending a check payable to Henderson Settlement, PO Box 205, Frakes, KY 40940 with Farm Support Fund - Equipment noted in the memo line. Another option is to visit our web site at https://www.hendersonsettlement.com/online-giving.html where you will find the option to easily and securely make a donation to the Farm Support Fund. *

Farm Equipment Fund Raising (continued)

*Any balance we receive in excess of what's needed to retire the remaining Hay Roller loan balance will be used to support ongoing Farm operations, or the additional equipment purchases mentioned above.

Vector Post Driver Model 3

Be the first to review this product

Availability: In stock

$10,975.00

Vector Post Drivers are designed with high grade steel and robust construction to make them virtually indestructible. The main features of the Model 3 Unit with Rock Spike are:
