

HYDRO-PURE™

MEDIA TECHNOLOGY

Motor Guard Introduces New Filtration Media

A leader in compressed air filtration, Motor Guard has developed its most efficient and durable filtration media to date. Hydro-Pure™ media has been specifically designed to absorb more moisture, and trap more contaminants than any other compressed air filter on the market.

The hydrophilic fibers in this new media remain strong and durable, even while wet and under the strain of the high pressures and temperatures of today's compressed air systems.

Elements Made with Hydro-Pure™ Media

Hydro-Pure™ cartridges are designed to capture particles as small as .01 microns in size as well as absorbing many times their weight in moisture and trapping the smallest traces of oil.

**M-723
SUB-MICRONIC
FILTER CARTRIDGE**

- Ultra Pure Hydrophilic Fiber is Contaminant Free & Non-Degrading
- Removes Condensed Moisture Oil Aerosols & Particulates
- Minimal Pressure Drop
- Quick & Clean Replacement
- Fits Motor Guard Filter Models M-26, M-30, M-40, M-60

Hydro-Pure™ Media Technology

Currently Available on Motor Guard
Model M-60R Air Control Unit
