

.... Our goal would be to get a good bit of the preliminary site work, with regard to the actual building pad area completed in this calendar year, so that we will be in a good position to move to the remaining site work and building construction as soon as the weather breaks in the new year.

This would potentially allow us to reach our ultimate goal of having the new indoor facility operational for the fall of 2021.

There is still the uphill battle of raising the additional funding to secure financing in the coming months. However this new facility would fill the large void for thousands of local families that enjoyed our programming each year when we had the GVBL Center operational. Obviously the new facility will also offer many other new opportunities that were always limited due to our lack of facilities at the old GVBL Center.

The hope is that when we reach the fall of 2021 that our community will be coming out of this most unique time brought on by this pandemic. In the meantime GVCO would like to give the community something very positive to watch unfold in the next 6-12 months as they try and forget 2020.
