Art History

9-12 grades

****Virtual/Online Format****

- **Six Weeks/60 hours total - Graduation Required Fine Arts Credit**
- **June 7 – July 16**
- *Instructor: Claire Hess*
 - This is a one semester course that offers a chronological survey of Western art from the dawn of civilization to the modern era. Although there is an effort to involve students with images and ideas that lie outside the Western tradition, the larger context in which these images are discussed is Western. The course combines proper historical techniques and procedures with an emphasis on the unique position and role played by the artist and the work of art, its context, and the critic. Special attention is given to our interpretation of a work of art based upon its intended use, audience, and role in a society. The course will also focus on how works of art shaped, and were shaped by western social, political, economic, and intellectual history. As a survey course, the material is approached as an introduction to the discipline. Two goals of the course are to encourage the student to pursue further study in college as well as become versed in the visual language of art.
