PORTFOLIO DECISION-MAKING PROCESS

Non-Discretion	The client sets the asset allocation and selects the managers in the portfolio based on Syntrinsic’s recommendations.
Current Partial Discretion	The client sets the asset allocation and Syntrinsic selects the managers within the portfolio.
Full Discretion	Syntrinsic sets the asset allocation and selects the managers within the portfolio.

*The class blended benchmark compares the asset class benchmark to the actual allocation of the portfolio each day. The target allocation is listed on this page to detail the targets used in monitoring the allocation of the portfolio.

Investment Strategy

The investment seeks a high level of current income; it may also seek capital appreciation. The fund invests principally in income producing debt instruments. Its allocations to non-investment grade debt instruments and investment grade debt instruments will change based on the sub-adviser's view of market conditions and, as a result, may range from up to 70% of the fund's assets in non-investment grade debt instruments and floating rate loans to up to 65% of the fund's assets in investment grade debt instruments, including corporate debt securities, asset-backed securities, mortgage-related securities, U.S. government securities and agency securities.

Investment Strategy

The investment seeks an annual rate of total return before fund expenses greater than the annual rate of total return of the Bloomberg 1-3 Year U.S. Government/Credit Index. The fund normally invests at least 80% of its net assets in the following types of U.S. dollar-denominated debt obligations: U.S. government and other public-sector entities, asset-backed and mortgage-backed obligations of U.S. and foreign issuers and corporate debt of U.S. and foreign issuers. It only invests in debt obligations rated investment-grade at the time of purchase by at least one major rating agency or, if unrated, determined by the advisor to be investment grade.

US Fund Short-Term Bond	80.8	84	76.0	36

Investment Strategy

The investment seeks to maximize income, to the extent consistent with preservation of capital, through investment in short-term bonds and income-producing securities. The fund typically invests at least 65% of its net assets in investment grade, U.S. dollar-denominated debt securities, as assessed at the time of purchase. It may invest up to 35% of its net assets in below-investment grade, high-yield debt instruments (commonly known as "junk bonds"), including distressed instruments that are in default. The fund may also invest up to 25% of its net assets in foreign debt securities.

Investment Strategy

The investment seeks long-term capital growth. Under normal circumstances, the fund invests at least 80% of its net assets (plus any borrowings for investment purposes) in small- to mid-cap stocks (the "80% Policy"). The portfolio managers generally consider small- to mid-cap companies to be those companies having market capitalizations within the range of companies comprising the Russell 2500 TR USD Index.

Investment Strategy

The investment seeks to track the S&P Global Infrastructure Index™. The index is designed to track performance of the stocks of large infrastructure companies in developed or emerging markets. The fund generally will invest at least 80% of its assets in the component securities of its underlying index and in investments that have economic characteristics that are substantially identical to the component securities of its underlying index and may invest up to 20% of its assets in certain futures, options and swap contracts, cash and cash equivalents.

Investment Strategy

The investment seeks to track the investment results of the S&P SmallCap 600 Index composed of small-capitalization U.S. equities. The index measures the performance of the small-capitalization sector of the U.S. equity market, as determined by SPDJI. The fund generally will invest at least 80% of its assets in the component securities of its index and in investments that have economic characteristics that are substantially identical to the component securities of its index and may invest up to 20% of its assets in certain futures, options and swap contracts, cash and cash equivalents.

Russell 1000 TR USD	100.0	86	100.0	34
US Fund Large Value	83.5	80	93.5	40

Investment Strategy

The investment seeks to track as closely as possible, before fees and expenses, the total return of an RAFI Fundamental High Liquidity U.S. Large Index that measures the performance of large U.S. companies based on their fundamental size and weight. The fund normally will invest at least 90% of its net assets (including, for this purpose, any borrowings for investment purposes) in stocks included in the index. The index measures the performance of the large company size segment by fundamental overall company scores, which are created using as the universe the U.S. companies in the RAFI Global Equity Investable Universe.

Investment Strategy

The investment seeks to track the performance of the Standard & Poor's 500 Index that measures the investment return of large-capitalization stocks. The fund employs an indexing investment approach designed to track the performance of the Standard & Poor's 500 Index, a widely recognized benchmark of U.S. stock market performance that is dominated by the stocks of large U.S. companies. The advisor attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index. The fund is non-diversified.

Investment Strategy

The investment seeks to track the performance of the FTSE Developed All Cap ex U.S. Index. The fund employs an indexing investment approach designed to track the performance of the FTSE Developed All Cap ex U.S. Index, a market-capitalization-weighted index that is made up of approximately 3,957 common stocks of large-, mid-, and small-cap companies located in Canada and the major markets of Europe and the Pacific region. The Advisor attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

For client use only. Consult prospectus, offering memoranda or other material for a more complete overview of risk, philosophy, and expense. Investment and Adviser fees impact performance. Past performance is no guarantee of future results. Not FDIC insured. No bank guarantee. May lose value. Data compiled by Morningstar Direct and has not been independently verified by Syntrinsic Investment Counsel.

Glossary

Alpha	The risk-adjusted return relative to the risk-adjusted return of the benchmark.
Beta	A measure of the volatility, or systemic risk, of an investment in comparison to the market as a whole.
R-Squared	A statistical measure that represents the percentage of a fund's movement that can be explained by the benchmark.
Standard Deviation	A measure of dispersion of a set of data from its mean. This measure shows how much an investment deviates from its historical return.
Sharpe Ratio	The average return over the risk-free rate adjusted for total risk as measured by standard deviation. Excess return per unit of risk.
Tracking Error	A measure of dispersion of a set of data from the mean of the benchmark. This measure shows how much an investment deviates from the historical return of the benchmark.
Information Ratio	The excess return of an investment over the benchmark adjusted for tracking error. Excess return per unit of tracking error.
Up Capture Ratio	A measure of performance calculated by dividing return by that of the benchmark times a factor of 100, only in up markets. Ratios over/under 100 indicate over/under performance in rising markets.
Down Capture Ratio	A measure of performance calculated by dividing return by that of the benchmark times a factor of 100, only in down markets. Ratios over/under 100 indicate under/over performance in down markets.
Net Return	All Returns in the report are time-weighted, representing a compounded rate of growth removing the effects of cash flows. If the accounts in the report feed directly to Black Diamond and Syntrinsic's management fee is debited directly from the account in the report, total portfolio returns are net of Syntrinsic's management fee. Asset class returns are net of manager and custody fees, but gross of Syntrinsic's fees.
Annualized Return	A measure of the compounded rate of growth in an investment displayed in yearly average.
Net Additions	The value in any specific time period that reflects external asset flows into or out of the portfolio. Investment advisory fees are not considered external flows and thus do not reflect in this value.
Net Gain	The value in any specific time period that reflects the net investment performance of the portfolio in dollars terms. Investment advisory fees are factored into this value to produce a net gain/loss calculation.

Disclaimers

Investment advisory services provided by IMA Advisory Services, Inc., (IMAAS), doing business as Syntrinsic.

Past performance is not indicative of future results. The above individual account performance includes all dividends and interest as well as realized gains and losses, and is net of applicable transaction fees, Syntrinsic's investment management fee (if debited directly from the account), and any other related account expenses. Account information has been compiled solely by Syntrinsic, has not been independently verified, and does not reflect the impact of taxes on non-qualified accounts. In preparing this report, Syntrinsic has relied upon information provided by the account custodian or record keeper. As updated and adjustments are made at the custodian or record keeper, these reports will reflect these changes. Please remember to contact Syntrinsic if there are any changes in your personal/financial situation or investment objectives for the purpose of reviewing/evaluating/revising our previous recommendations and/or services. Please also advise us if you would like to impose, add, or to modify any reasonable restrictions to our investment adviser services. A copy of our current written disclosure statement discussing our advisory services and fees continues to remain available for your review upon request.

The HFRI and CPI Indices update around the 5th business day and business day of the month for the previous month. The NCREIF, Cambridge, and Cliffwater indices are published quarterly and lags on to two quarters. Additionally, these indices are subject to revisions over a period of 4-5 months. These updates will impact performance of these indices, including benchmarks that have these indices as part of their definitions.

Class Blended Benchmarks are based on the Client's actual asset allocation at the asset class level. The benchmarks allocation adjusts daily based on the allocation weights applied to asset class benchmark returns. Policy Benchmarks blend the relative weight of each asset class benchmark to the target allocation. They track target allocation changes over time and compare the performance of each asset class to a rules-based broad market index. With alternative investments, Syntrinsic relies upon benchmarks constructed of peer group data. Objective Benchmarks included in this report represent the Client's stated objectives as presented to Syntrinsic in writing or verbally. Objective Benchmarks are presented for comparison purposes only and do not imply a guarantee to achieve portfolio returns at or above the stated objective for any time period. The client objective may or may not reflect what Syntrinsic considers a reasonable return target based on the firm's capital market forecast.

Summary of Investment Managers data has been compiled solely by Morningstar and its affiliates or other third parties and has not been independently verified by Syntrinsic. Performance returns are calculations based on NAV values within Morningstar rather than ending market price values within Black Diamond; some discrepancies may exist.

Please compare this statement with account statements received from the account custodian. Please also note that the account custodian does not verify the accuracy of the advisory fee calculation.

Historical performance results for investment indices and/or categories have been provided for general comparison purposes only, and generally do not reflect the deduction of transaction and/or custodial charges, the deduction of an investment management fee, nor the impact of taxes, the incurrence of which would have the effect of decreasing historical performance results. It should not be assumed that your account holdings correspond directly to any comparative indices. Vanguard products may experience additional differences given the managers' use of fair-value pricing.

This performance report may include investments for which Syntrinsic does not provide ongoing advice or recommendations, including investments that the firm did not originally recommend to the client as well as those that the client has retained despite the firm's recommendation to the contrary. Inclusion of an investment in this performance report does not represent a recommendation of Syntrinsic to retain the investment or otherwise imply or confirm the investment's suitability in the past, present, or future.

IMAAS is a federally registered investment adviser under the Investment Advisers Act of 1940 (CRD #112091). Registration as an investment adviser does not imply a certain level of skill or training. IMAAS is also a registered insurance agency. The oral and written communications of an adviser provide you with information about which you determine to hire or retain an adviser.
