

Uniting "Wee" Communities Across Ontario

TOGETHER WEE CAN "COME TOGETHER" 2021

March: Wee Watch Kids Have Talent

A talent is something that a child enjoys doing and seems to come naturally to them. It may be drawing, skipping, working with numbers, dancing, making animal sounds, telling jokes, making music, or building towers with blocks – anything goes as long as it is something the child loves. Recognizing and commenting positively on a child's talent builds their self confidence and gives them a creative outlet. The "Wee Watch Kids Have Talent" show will give children the opportunity to express their talents through various mediums and methods.

During the week of **March 15-19**, Providers and the children will have fun discovering their "talent". The time they have spent with the children in their care gives them great insight into what comes naturally to them.

Foundation 2: Well-Being (April-June)

During the second quarter, April-June, our focus is on well-being. Our home childcare Providers are excellent at promoting the overall well-being of the children in their care. There are many ways they do this already, we are simply providing some additional ideas to support our focus on this for the next few months.

A childcare environment that supports the well-being of children is focused on ensuring the development of physical and mental health and wellness. To support our program focused on well-being, we have supplied our homes with a set of Affirmation Cards. These cards will help the children get in a positive mindset daily! They can be used throughout the year.

April: Eco Kids Challenge

This month, in honour of Earth Day, Providers and children will be participating in our Eco Kids Challenge. The Eco Kids Challenge is a list of fun environmental based challenges for children to complete together with their Provider. The challenge will not only foster a child's well-being and promote a love of outdoor play, but will also educate, inspire, and empower children to protect the Earth's environment.
