

Wee Play & Learn

Wee Beginners (0-18 months): Ice Painting

What you need:

- Small pots or ice cubes tray
- Food colouring
- Water
- Craft sticks
- Card or paper

What to do:

1. Fill the small pots (like a yogurt container) or the ice cube tray with water
2. Add food colouring
3. Place craft sticks in the pots or tray and put it in the freezer until the water is ice
4. Give each infant a paper or cardstock paper (might be easier for the infants to do it in their highchair)
5. Place the coloured ice cubes on the table or tray and let the infants explore and create with it.

*Note: infants may taste the ice cube which is safe, they may colour on themselves, or the furniture but it won't leave a mark or stain
