

# Wee Play & Learn

Wee Explorers  
(18 months – 3 years):  
Shamrock Sprouts

## What you need:

A green household sponge

Seed Packet (lettuce,  
spinach, broccoli)

A water spray bottle

Shallow plate

Marker

Scissors

## What to do:

1. Trace a shamrock shape onto the dry sponge with a marker.

2. Soak the sponge once again; you want the sponge to be damp, but not dripping.

3. Scatter the seeds across the top of the sponge, gently poking the seeds into the holes.

4. Mist often with a water sprayer.

5. Soon you should have your very own sprout garden.
