

Wee Play & Learn

Wee Beginners (0-18 months): Cheerios Corn on the Cob

What You Need:

- Yellow and green construction paper
- Cheerios
- Glue

What to do:

1. You will need to cut out a corn on the cob template ahead of time for your infant before starting this activity.
2. Place Cheerios in a bowl or a plate.
3. If you have an older infant (12 months or older) give them an opportunity to spread the glue over the paper. This will help build their fine motor skills. If you have a younger infant, you can spread the glue for them or use the hand over hand technique.
4. After the glue is spread, ask your infant to decorate the corn with the cheerios.
5. Let it dry and you can display or hang it up in your home.
