Uniting "Wee" Communities Across Ontario

TOGETHER WEE CAN "EXPLORE OUR PLANET" 2019

Wee Watch's unique program, "Together Wee Can", provides a wonderful opportunity to bring all of our homes across Ontario together to participate in themed activities and events on specific days, weeks and months throughout the year. Planning a few events each year strengthens the Wee Watch community we are all part of as well as the community we live in.

This years Together Wee Can program is called "Together Wee Can Explore our Planet". It's easy to forget that we live on one tiny planet in a huge universe; children are only familiar with their surroundings, which is just a tiny part of planet Earth.

The natural inquisitiveness that children possess will spark some fantastic discovery throughout the year. Each month Providers and children will explore a different component of our planet: desert life, different bodies of water, forests, seasons, bugs, mountains & volcanoes, the arctic, animals big & small, weather, people and space!

March 18-22, 2019: Let's Make a Splash

World Water Day is on March 22nd every year, a day about focusing our attention on the importance of water for everyone around the world. World water day gives us the perfect opportunity to teach children all about water.

So this month we will spend the week exploring different bodies of water, the water cycle, compare salt water and freshwater, and discuss where to find water, how we use water, who needs water, and little things we can do to help preserve water.

Providers: Don't forget to send in photos of children participating in this months Together Wee Can activities to enter our contest!

April 22-26, 2019: Fun In The Forest

Earth day kicks off our weeklong event, "Fun in the Forest". Wee Watch homes will spend the week learning about and exploring all kinds of Forests. Our planet has a number of different types of forests, all with their own types of trees and animals.

Trees are vital to our planet. As the largest plants on the planet, they give us oxygen, store carbon, offer us shade, stabilise the soil and give life to the world's wildlife. They also provide us with the materials for tools and shelter.

While learning all about forests this month and in celebration of Earth day on April 22nd we will be giving back to our planet by planting trees! Each home will receive a tree seedling to plant in their community. Even one tiny tree can make a huge difference.
