

# Wee Play & Learn

Wee Beginners  
(0-18 months):  
Exploring Snow for the  
First Time

## What you need:

- Blanket or mat to sit on
- Warm clothes

## What to do:

1. Place the blanket or mat on the snowy ground
2. Let the infant explore the snow around them.
3. Have shovels, buckets, or containers to fill with snow

For some of the infants this may be their first experience touching, eating, or smelling snow. If the infant is walking, give him/her the opportunity to explore the snow by walking around the yard or a local park.
