

# Wee Play & Learn

Wee Builders  
(3 – 4 years):  
Rain & Wind Process Art

## What you need:

Blue paint  
White paper  
Straw  
Spoon  
Water  
Container for paint & water

## What to do:

1. Mix the blue paint with some water.
2. Using a spoon, place a drop of paint onto the paper (like rain).
3. Use the straw to blow the paint (like wind blowing the rain & puddles).
4. Watch as the paint moves around the paper when children blow through the straw.
5. Children can continue to blow the paint across the paper to create unique designs.
6. Children can then cut their artwork into a raindrop shape.
