

Wee Play & Learn

Wee Beginners
(0-18 months):
Finger Painting Festive Lights

What you need:

- Black marker
- White paper
- Colourful paints

What to do:

1. Encourage children to create their very own lines using the black marker. Some children may like to create swirls, straight lines, wavy lines or squiggly lines. You can also draw lines from corner to corner, side to side or up and down. The ideas for creativity are endless.
2. Children place one finger/thumb for each colour paint and press the paint along the line to form or imitate festive lights. You can press the painted lights directly on top of the lines or have them hanging underneath the lines, slightly touching the black line.
3. Create patterns using the different colours provided, such as red, blue, green, red, blue and green again.
4. Children can finger paint the festive lights and make it into a card to give to someone special.
