THIRD GRADE EXPLORES ANTARCTICA

The third grade has traveled to and is exploring the bottom of the world—Antarctica, the coldest, windiest and driest place to visit, is fascinating to our third graders. They are learning about the different animals that are able to live in this extraordinary climate. Blue whales, albatross, Weddell seal pups and our favorite animal, the penguins, are some of the animals that can withstand the icy cold temperatures of Antarctica. While learning about these different animals, the students are honing in their main idea and detail skills while summarizing what they read.
