STUDENTS PARTICIPATE IN NATIONAL AND REGIONAL MATH COMPETITIONS

This week, students participated in two math competitions. The monthly NJ Math League has six questions that require students to use skills from high school classes and a variety of problem solving techniques, as they enjoy the challenge! The national American Mathematics Competition, run by the Mathematical Association of America, was taken by thousands of students across the country. There was a 10th grade and 12th grade test, assessing students' problem solving skills. Students with high scores will continue on to the Olympiad program.
