## STUDENTS PRESENT MULTIMEDIA ASERET HADIBROT PROJECTS

Rabbi Sharbat's chumash classes recently presented their aseret hadibrot project. The goal of the project was for the students to understand and analyze the aseret hadibrot and figure out ways to implement them in modern day situations. The jigsaw teaching technique was applied, where a student or pairs of students were given a specific commandment to research with the goal of teaching it to the class. Students used books, articles, videos and other resources to research their topic. They presented their findings by either using google slides, making a video or creating an online trivia game.
