

ITS California's Northern Section and our partners invite you to join their next luncheon workshop, part of a regular series that focuses on the deployment of Intelligent Transportation Systems in California. These events are designed to attract a broad audience of transportation professionals at public agencies, private firms and research centers.

APRIL 3RD, 2019

TRANSPORTATION ACROSS JURISDICTIONS – CAN WE ALL GET ALONG?

Transportation projects span beyond jurisdictional boundaries, and with 9 counties and over 100 cities in the Regional Bay Area there are numerous opportunities to encounter additional agencies when implementing ITS or transit projects. This panel will discuss city, county, transit and state agencies' collaborative efforts with cross-jurisdictional project planning, deployment and operations in the region.

In partnership with the East Bay Traffic Engineers, our panelist will share their experiences, challenges and ideas for improving communications and cooperation between agencies for successful project deployments.

As always, a sizeable Q&A section will be offered along with the opportunity to network with panel members and peers. A buffet lunch is included with registration.

PANEL

- **John Urgo**, AC Transit
- **Fred Kelley and Kevin Briggs**, City of Hayward
- **Caltrans District 4** (invited)
