

COVID-19:

Health and Safety Measures, 9.15.21

COVID-19 VACCINATION

SNAP has put together a comprehensive COVID-19 Vaccination policy. This policy can be viewed on our website, www.snaparts.org/programs. As a result of that policy, all people engaging in SNAP programs are required to be vaccinated. Employees, contractors, participants, parents, caregivers and volunteers need to send a copy of their vaccination card before participating in or attending programs. Any parent, caregiver or group home staff person staying at a program to assist a participant will need to have proof of vaccination on file with SNAP. Group home residents not registered for SNAP programs cannot wait in the art room or rehearsal space. SNAP will maintain documentation regarding vaccinations in a confidential manner. Images can be emailed to snapartsoffice@gmail.com. If you have any questions, please reach out to Ms. O'Mara at the previously mentioned email or at 781.325.8025.

MASKS

SNAP programs will take place at the Lexington Community Center. The Lexington Board of Health has issued an indoor mask mandate. SNAP will require masks for everyone participating in-person in our programs at the Lexington Community Center. There is no eating at SNAP programs. People can bring water and a mask can be removed to drink but then put back on. Masks need to cover the nose and the mouth entirely.

SOCIAL DISTANCING

Based on current guidance from the CDC regarding indoor classroom-type spaces, SNAP staff and volunteers will work to maintain a socially distanced environment of three feet amongst participants, parents and caregivers. This will include arranging seating for both rehearsals and art classes at that is at least three feet apart. Group home residents coming together to participate in our art programs will not need to be seated three feet apart since they are already living together.

HYGIENE AND HANDWASHING

Everyone participating in SNAP programs is encouraged to frequently wash their hands. Hand sanitizer will be available at SNAP rehearsals and art classes. Everyone should wash/sanitize their hands especially upon arrival to SNAP programs, before and after eating a snack, after bathroom use and after coughing or sneezing.

CLEANING AND DISINFECTING

The Lexington Community Center is committed to maintaining a safe and clean environment, including regular cleaning of high-touch areas, program space and equipment. SNAP staff and volunteers will disinfect program space and materials in between consecutively offered art classes.

These protocols are subject to change as new guidance becomes available.
