

September Monthly Highlight!

This month, our CEO, Neale, attended the "Visionary Diner Reception and Tour" of a brand-new state of the art facility that has just opened in San Antonio called the "MAC." The facility was described as, "like the Mayo Clinic but for people with special needs."

The MAC is the first of it's kind! By providing health, living, and other resources to individuals with special needs and disabilities in one location, the facility aims to become a destination for individuals with special needs and disabilities.

The MAC provides medical and non-medical services all under one roof.

The facility is built with special attention to Ultra-Accessibility™ and is sensory sensitive to eliminate physical barriers.
