

2025

FTZ Annual Report Takeaways

Export Activity

- 83.9% of shipments into the zone were re-shipped out of the zone.
- Over \$45.3 million in exports shipped to foreign countries.
- Total shipment value exceeded \$109 million.

Merchandise Activity

- \$37.8 million in foreign-status merchandise received into FTZ 93.
- Largest import category: Textiles/Footwear/Leather from China.
- Additional imports included tobacco, consumer products, and industrial materials.
- \$11.1 million in customs duties collected during the year.

Foreign Status Admissions

- Admissions included \$32.9M in Privileged Foreign merchandise and \$4.5M in Non-Privileged Foreign merchandise.
- Approximately 88% of foreign-status merchandise entered under PF status.

Key Takeaways

- FTZ activity directly supported 138 warehouse/distribution positions within activated areas, with participating operators supporting more than 5,000 regional jobs overall.
- FTZ 93 operators remain deeply integrated into global supply chains spanning Europe, Latin America, and Asia.
- PF status locks in duty rates when merchandise enters the FTZ. Current trade conditions and tariff policies are increasingly requiring operators to admit merchandise under PF status. As a result, many of our operators are no longer able to fully utilize the inverted tariff benefit.
- The high export percentage demonstrates that FTZ 93 plays a significant role in supporting international trade activity in the region.
