

THE NEXT GENERATION OF OCULAR TREATMENT

EyeGen™
AMNIOTIC MEMBRANE ALLOGRAFT

Your Clear Choice

Ocular Amniotic Membrane Allograft

Human amniotic membrane (HAM) can be applied to the surface of the eye to cover or offer protection from the surrounding environment in ocular repair and reconstruction procedures.

EyeGen™ is a single layer, clear and flexible amniotic membrane allograft available in discs and rectangular sizes.

HAM Published Uses

- Persistent Corneal Epithelial Defects
- Corneal Ulcers
- Pterygium Surgeries
- Conjunctival Surface Reconstruction
- Bullous Keratopathy
- Chemical/Thermal Burn
- Ocular Surface Reconstruction
- Stevens-Johnson Syndrome (SJS)
- Leaking Filtering Blebs after Glaucoma Surgery

SAMARITAN  BIOLOGICS

Samaritan Grafts - The Graft That Gives Back

► Long History of Safe Successful Ophthalmic Use

In 1940, de Roth is the first person credited with using fetal membranes in ophthalmic surgery.¹

Sorsby and Symons first reported use for treatment of chemical burns in 1946.²

Over the past 25 years there have been many publications detailing the benefits of amniotic membrane for an increasing variety of ophthalmic applications.^{3,4}

► Ease of Use

- Ready to apply out of package
- No thawing needed
- No glue or sutures required

► Environmental & Practice- Friendly

- No freezer required
- Ambient temperature storage
- No bulky box
- Slim packaging

EyeGen™

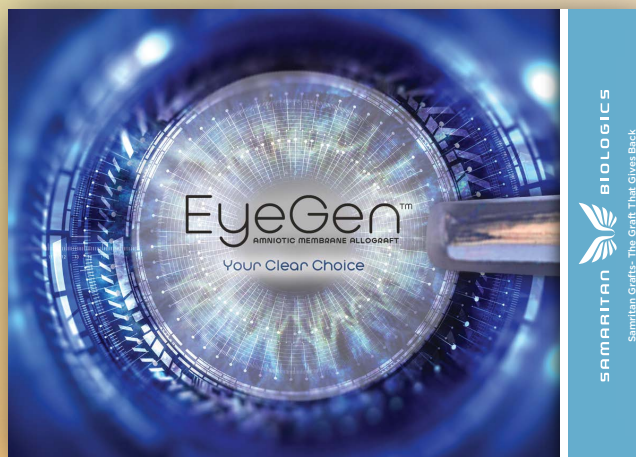

Sizes	Part #
8MM	EG-08D
10MM	EG-10D
12MM	EG-12D
15 X 20MM	EG-1520
20 X 20MM	EG-2020
20 X 30MM	EG-2030

► Proprietary Processing

► Optimized Handling Characteristics

► Terminally Sterilized to a Sterility Assurance Level (SAL) of 10⁻⁶

► Rigorously Tested to Meet or Exceed Current FDA Standards to Ensure Safety

Breakthrough T1D™
Formerly JDRF

Samaritan Biologics donates at least 10% of after tax profits to Breakthrough T1D and other 501(c)(3) charities. We are dedicated to turning Type 1 into type none.
