

Precision Light. Proven Science. Personal Healing.

ZOGNIQ

Welcome to the Cutting Edge!

What is ZogniQ™ Polarized Light (ZPL)

ZogniQ™ ZPL is Patent Pending polarized light technology that precisely activates the key biochemical pathways essential for effective photobiomodulation. Leveraging quantum physics, our polarized light precisely aligns with cellular chromophores—particularly cytochrome c oxidase (CcO) to efficiently stimulate quantum orbital resonance, resulting in enhanced cellular metabolism and accelerated healing—with power, safety, and precision.

Patent Pending ZPL Innovation

ZogniQ™ ZPL is built on a patent-pending platform that enables multi-wavelength control and personalized treatment protocols for a wide range of therapeutic applications.

Why Choose ZogniQ™ ZPL Technology

Scientifically Engineered and Patents Pending: Designed by a team of medical professionals, scientists, and device engineers with over 60 years of combined experience.

- **Multi-Wavelength Precision:** Harnesses the power of polarized red, blue, yellow and infrared wavelengths—each selected for optimal tissue penetration and cellular effect.
- **Superior Efficiency of ZPL Technology:** Polarized light aligns precisely with the dipole moments of cellular chromophores, optimizing quantum excitation for superior therapeutic outcomes.
- **Pre and Post Treatment 8K Image capture - COMING SOON:** AI analysis of client images to assist in tracking client progress as well as other Patent Pending functionality.
- **Advanced AI Connected Platform:** Future proof investment with automatic software updates, remote diagnostics, as well and a robust AI technical roadmap with patent pending functionality coming soon.
- **Faster, Targeted Results:** Achieve therapeutic goals quicker with reduced overall energy, minimizing risks of thermal or photochemical side effects commonly seen with unpolarized therapies.
- **Enhanced Tissue Penetration:** Polarized light interacts preferentially with cell membranes and extracellular matrix, improving molecular alignment and achieving uniform, deeper penetration.

What Can ZogniQ™ ZPL Help With?

ZogniQ™ ZPL is designed to support treatment for a broad range of conditions:

- Dry Eye & Ocular Inflammation
- Blepharitis & Meibomian Gland Dysfunction (MGD)
- Muscle & Joint Pain
- Wound Healing & Post-Surgical Recovery
- Skin Rejuvenation & Acne
- Neurological Support & Circulation Enhancement

If you're a healthcare provider looking for drug-free relief for your clients - ZogniQ™ ZPL offers real results without side effects.

The ZogniQ™ Difference

Unlike generic LED or low-cost red-light devices, ZogniQ™ Polarized light combines true low laser light precision with intelligent controls to deliver deeper, more effective photobiomodulation.

- Medical-Grade Power (Highest output available), At Your Fingertips
- Individually and Combination Tunable Wavelengths
- Clinically Inspired Treatment Modes
- IoT Connectivity
- Pre and Post Treatment 8K Image Capture
- Quiet, Cool, and Energy Efficient
- Immediate ROI Through Creative Financing with ZogniQ™

Designed by Experts. Developed for You.

ZogniQ™ ZPL is the creation of the team behind Zognition™, innovators in medicine and medical devices. With experience spanning ophthalmology, med devices and health tech, our mission is to build tools that enhance life—naturally and effectively.

Join the Polarized Light Therapy Revolution

Light is medicine. And ZogniQ™ ZPL is at the forefront of polarized light low level laser therapy.
