

1. What prompted you to open your business in Placitas, and what should we tell community members why they should support your business.

I am a life long resident of Bernalillo, and I was looking for an office closer to home back in 2012. I found my home away from home in the La Puerta Building in the wonderful community of Placitas. The past 13 years I have established a successful Farmers Insurance Agency. I know the area and the logistics of the homes in this area. I offer one on one, face to face insurance consultations. We are in a time of computers and everything done with the internet and phone. I offer a local office where you can come in and pay your insurance, ask questions and pick up id cards! All with friendly staff! Of course we offer online services, but we pride ourselves in community! This means knowing our customers.

2. What is the best/most important/positive thing about living and owning a business in Placitas.

The community of Placitas is full of friendly and intelligent individuals! They are looking for value with good coverage to protect their assets. Most of my clients have umbrellas in place to keep their assets safe!

3. We're sure that there is something about you (or your business) that Placitans might not know. What is that something – that you are willing to share.

I am a native of New Mexico and Bernalillo. I have been a Farmers Agent for 18 years. I received my business experience at Target as a manager for 17 years. I was recruited out of college by Target, and then by Farmers to become an agent. I'm a former Spartan from Bernalillo that played three sports: Volleyball, Softball and Basketball. I was a jock! ;0)
