

October 2025 Weed ID

The Weed ID this month is a collection of plants from the same family, but not all the same *genera*. They also happen to be the new cover of the 2026 [MP44](#)! Looking at the upcoming 2026 MP44 cover below, see how many of the seedling flowers you recognize. These weeds can be tough weeds to control but the MP44 has you covered. This month isn't a contest, but plant IDs from Left to Right follow on page 2.

The weeds are from left to right:

1. Entire leaf Morning glory (*Ipomoea hederacea*)
2. Cypress vine morning glory (*Ipomoea quamoclit*)
3. Palm leaf morning glory (*Ipomoea heptaphylla*)
4. Small flower morning glory (*Jacquemontia tamnifolia*)
