

ARNIE'S PET FOODS

Arnie's Pet Foods in the Alamo Plaza at 5601 South 56th Street (56th & Hwy 2) offers a full line of high quality all natural foods for your dog or cat, along with all natural treats and chews. Our products are produced by family owned and operated companies, not outsourced to corporate dog food manufacturing plants. This assures the pet foods you purchase are produced to the highest standards in the industry. Check us out. I think you'll like what we have to offer at Arnie's Pet Foods.

Alamo Plaza - 56th & Hwy 2 / (402) 904-3573 / arniespetfoods.com

FROMM - Since 1904, The Fromm Family has maintained a tradition of innovation dedicated to the health and nutrition of your dog or cat. In the 1930's, The Fromm Family introduced the first canine distemper vaccine. In 1949, we introduced the concept of premium pet food to the public. As the country's first and oldest premium pet food company, we have earned the reputation as an industry leader, producing only the highest grade pet foods with the finest natural ingredients you will find. Fromm Family Foods is now in its fourth generation of being family owned and operated. We take great pride in the family commitment, as it ensures that our customers will continue to receive a superior pet food product now and for years to come.

ACANA - A Biologically Appropriate™ dog and cat foods from Fresh Regional Ingredients made from start to finish in our Acana's own award-winning kitchens. Acana's mission represents a new standard in pet food, designed to nourish your dog and cat in two ways. First, according to its natural evolution to a meat and protein-rich diet. Second, using meats, poultry, eggs and fish that are sustainably ranched, farmed or fished by local suppliers and delivered to our kitchens fresh each day. We think you'll love ACANA. More importantly, we think your dogs and cats will too.

ORIJEN - Nourish your dog as nature intended with ORIJEN's unmatched fresh regional meat inclusions that mirror your dog's evolutionary diet, excluding high-glycemic carbohydrates, vegetable proteins, and the long lists of synthetic supplements found in conventional dog foods. An abundant variety of fresh meats and whole prey rations makes Orijen rich in protein from meat using limited carbohydrates and glycemics. Produced in Orijen's own award winning kitchens, never out-sourced.

ZIGNATURE - Zignature strives to create the best limited ingredient dog food in the world. Using meat first, these limited ingredient recipes provide a Physiologically Tuned™, nutritionally correct diet for your canine companions. Meat first provides the animal protein dogs need to thrive, while Zignature's limited ingredient philosophy eliminates allergenic ingredients, such as Chicken, Corn, Wheat Gluten, Soy, and Potatoes. The result is an optimal hypoallergenic, grain free, and low carbohydrate nutrition. Building on this natural foundation vital supplements such as antioxidants, essential fatty acids, and a complete spectrum of vitamins and minerals are added for a holistic pet food that goes beyond nature to become your pet's signature food for life. While we all consider our pets to be members of the family, their dietary needs are different than ours. As carnivores, they require a diet high in protein. That's why the first ingredient in any Zignature® product will always be quality meat or fish. This isn't just what your pet craves, it's what they need to build a soft, silky coat, healthy muscles, and strong bones. Meat first, the way nature intended.

TASTE OF THE WILD - Your pets crave a taste of the wild. Go ahead and give them one. Taste of the Wild produces premium, grain-free pet formulas that are based on your pet's ancestral diet. All of our formulas rely on ingredients like quality meats and probiotics that maximize the nutritional health benefits for your pets. It's the balanced diet that nature intended.

Made with real roasted meats (bison, elk, lamb, venison, salmon, wild boar) and supplemented with vegetables, legumes and fruits, these grain-free formulas provide a superior taste sensation, highly digestible energy and antioxidants to support a healthy immune system. All of Taste of the Wild products are formulated to meet your pet's specific needs. To do so, they use a variety of ingredients to optimize the health benefits of each formula. The primary ingredients used and how they can positively impact your pet's health is important.

Taste of the Wild was created by one family who believes that every pet deserves the best nutrition and every pet owner deserves a fair value. We don't make anything we wouldn't feed to our own pets. It's the standard to which all Taste of the Wild products are held, and we're happy to share it with you and your family. Welcome to the pack.

Arnie's Pet Foods continues to add nutritionally correct, all natural, dog foods lines. We only select dog foods from established family owned and operated companies with a reputation of maintaining a high degree of safety using only locally sourced products. Our goal at Arnie's is to provide the highest quality pet foods available for the health and nutrition of your companion dog.
