

Preparing for the SAT at BK

Juniors - You will be taking the SAT on March 3rd, 2021. This is a quick resource guide that will help you formulate a study plan between now and then.

Suggested methods of preparation:

- 1) Set aside dedicated time each week to focus on SAT practice.
- 2) Start by taking a practice test (either online or a printed version). You can access practice tests through the College Board website or through Khan Academy.
- 3) Score your practice test so you know your areas of strength and challenge. Use your score to decide what areas to focus on.
- 4) Utilize Khan Academy to practice for the SAT. The site is personalized and gives instant feedback. It is an EXCELLENT resource!
- 5) Write a practice essay. Use this [rubric](#) to score your writing. There is no essay section on the PSAT so this is new to you. The more practice you can get, the better!

If you have any questions, please see me in the Study Center. I can help you print practice tests, get Khan Academy set up, or give you links to other helpful resources. Good luck!
