SCRIPT - to be edited as you see fit:

My name is [your name] and I'm a constituent that lives in [zip code]. I am horrified by the recent deportation of Juan Nicolás and his family, immediately after going to the hospital in respiratory distress. This is un-American and lacks basic human decency! I expect to hear you voice your outrage at this Department of Homeland Security (DHS) behavior and the continued incarceration of children in concentration camps!! The camp is overcrowded and is not healthy for anyone, much less children with still developing immune systems!!

I implore you to continue to remain firm in not providing one more dollar to DHS! Family detention should be ended. ICE activity should be completely defunded and operations paused until the system can be reformed. Strict safeguards and oversight must be in place for legal and humane treatment for ALL individuals, during detainment and at safe detention centers.

Thank you!
