

In Colorado it is a little too soon for most planting outside, but it is the perfect time to start seedlings inside!

Come hang out in the agricultural exhibit at the Overland Trail Museum and absorb the history of crops in this area. Get a closer look at different seeds, roots and starters of various crop.

Head outside to see how quickly farm machinery evolved. Extra crop rid-bits will be planted throughout the museum, don't *leaf* before you find them all! Settlers' Saturday Planting Season is free to kids 12 and younger on Saturday, April 3rd. Planting Season activities and crafts will be available all through April.
